

Discover Psychology

Public Lecture Series

Fall 2011 Program

Science you can use

This special public lecture series is organized by the Department of Psychology, Neuroscience & Behaviour at McMaster University and is aimed towards students, staff, faculty, alumni, and all members of the community. The lectures feature dynamic McMaster professors discussing fascinating and practical topics related to the field of Psychology.

Sep 23: A very extended family: kin recognition and human affairs. (Daniel Brian Krupp) Opening reception to follow the lecture.

Oct 14: The amazing, changing, aging brain. (Allison Sekuler)

Nov 18: Seeing music? How vision affects the way music "sounds." (Michael Schutz)

Dec 9: Why evolutionary theory is crucial to the science and practice of mental health. (Paul Andrews)
